CARE INSTRUCTIONS

One of the best ways to keep your TITANIA Umbrella looking magical is to properly maintain the fabrics...

CLEANING

Hand wash in cold water or wipe down with a sponge using wool detergent.

Brush off any loose dirt.

Do not use hot water & hard detergents.

Do not bleach.

Air dry on a line, or dry canopy on frame.

Do not tumble dry.

CARE TIPS AND PROTECTION

All our canvas is treated for water resistance, and is anti-fungal however...

Long-term exposure to UV Rays has an adverse affect on the canvas, causing premature fading, and weakening of the textile fibres. It is advisable therefore to cover or remove the canopy when not in use, and store indoors.

Always put away your umbrella completely dry when storing.

Don't use in windy conditions.

This umbrella is rain proof, not waterproof so do not leave out for prolonged periods in adverse conditions.

Practice extreme caution when using fuel - powered lanterns or heaters under, or beside the umbrella.

Always use a suitable umbrella base weight in conjunction with this umbrella, even when used with tables, or other outdoor furniture.

Please ensure the internal ribs are not crossed before opening the parasol canopy.

Most importantly enjoy your umbrella and revel in many enchanted moments.
